
Environmental Friendly Bamboo Paper Straw

INTRODUCTION

The paper straws are safe, non-toxic, and free from any smell or odor because they are processed with food-grade environmental protection paper and printed with soy-based ink. They are recyclable after use and of good water resistance, bright colors, full texture and beautiful appearance. Completely degraded can be achieved within 3 or 4 months after being discarded. The products meet the hygienic requirements of European and American countries for food safety packaging.
